Citizenship: U.S. Citizen | **Location:** New York, NY

SUMMARY

Head of Prediction Markets at DRW, actively researching and trading systematic strategies in event-driven markets while building the firm's prediction-markets business. Previously worked in quantitative research and machine learning at Two Sigma and Bridgewater Associates. M.Eng. and B.S. from MIT.

EXPERIENCE

DRW New York, NY
Head of Prediction Markets *Feb. 2026 - Present*

- Research and trade **systematic strategies** across event-driven markets.
- Build DRW's **prediction-markets business** across market structure, infrastructure, and team development.

Bridgewater Associates - AIA Labs New York, NY
Machine Learning Engineer *Sep. 2024 - Dec. 2025*

- Developed **calibrated LLM forecasting systems** for macroeconomic research and systematic investing.
- Built **leakage-safe evaluation** and production infrastructure for temporal data and model assessment.

Investment Engineer Intern *Jun. 2023 - Aug. 2023*

- Built data models and statistical tools for macroeconomic business-cycle analysis.

Two Sigma New York, NY
Quantitative Researcher (Part-time) *Jan. 2024 - Jun. 2024*

- Researched **systematic equity strategies** from signal development through portfolio construction and validation.
- Developed methods to improve **signal diversification** and robustness across market regimes.

MIT CSAIL - Julia Lab (Advisor: Alan Edelman) Cambridge, MA
Graduate Researcher - Scientific ML & INS *Sep. 2023 - Jun. 2024*

- Built Julia physics-informed neural ODEs for strapdown INS and cut 3D RMSE by **63%** vs tuned EKF.
- Built an IMU simulation harness supporting **100+** daily walk-forward robustness tests.

EDUCATION

Massachusetts Institute of Technology Cambridge, MA
Master of Engineering in Computer Science, GPA: 5.0/5.0 *Aug. 2023 - Jun. 2024*

- Thesis: Physics-informed neural ODEs for inertial navigation with Prof. Alan Edelman.

Bachelor of Science in Mathematics & Computer Science *Aug. 2019 - May 2023*

SELECTED RESEARCH & PROJECTS

AIA Forecaster: LLM-Based Judgmental Forecasting *Bridgewater, 2025*
Technical Report: LLM Agents, Calibration, Forecasting

- Combined agentic search, supervisor reconciliation, and calibration to match **superforecasters**.
- Combined model and market forecasts to **outperform consensus** and deliver forecasting at scale.

SET // MARKET: Bayesian Market-Making Game *2026*
Independent Project: Market Making, Bayesian Inference, Game Theory

- Built a five-round trading simulation with **two-sided quoting**, inventory risk, and Bayesian agents.
- Designed private research, **order-flow learning**, and exact zero-sum settlement.

Full research portfolio: m-mcmanus.com/research/

TECHNICAL SKILLS

Trading: Prediction Markets · Systematic Trading · Market Making · Market Microstructure · Risk Management

Programming: Python · C++ · Julia · SQL/Spark · Go · JavaScript

ML/AI: PyTorch · Transformers/LLMs · Reinforcement Learning · Scientific ML · XGBoost

Infrastructure: AWS · Docker · Kubernetes · PostgreSQL · Distributed Systems · CI/CD

LEADERSHIP & ACHIEVEMENTS

MIT Pokerbots President: Led Harvard-MIT competition for **250+ students**; secured **\$100k+** in sponsorships.

MIT Varsity Squash: Four-year starter; helped achieve a national team ranking of **16th**.
